The rates of return depicted are used only to illustrate the effects of the compound growth rate and are not intended to reflect future values of the fund or returns on investments in the fund. The "Growth of \$10,000" chart shows the final value of a hypothetical \$10,000 investment in the fund as at the end of the investment period indicated and is not intended to reflect future values or returns on investments in the fund.

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus before investing. The indicated rates of return are the historical annual compounded total returns including changes in unit/share value and reinvestment of all distributions and does not take into account sales, redemption, distribution or optional charges or income taxes payable by any securityholder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.
