2021 SEMI - ANNUAL REPORT

MIDDLEFIELD REIT INDEXPLUS ETF

The Middlefield Group was established in 1979 and is a Specialty Investment Manager which creates investment products designed to balance risk and return to meet the demanding requirements of Financial Advisors and their clients. These financial products include Exchange-Traded Funds, Mutual Funds, Private and Public Resource Funds, Split Share Corporations, Venture Capital Assets, TSX Publicly Traded Funds and Real Estate Investment Funds and Partnerships.

Middlefield's investment team comprises portfolio managers, analysts and traders. While all of our investment products are designed and managed by Middlefield professionals, some involve strategic partnerships with other "best-in-class" firms that bring unique value to our product offerings. In 2014, we entered into an exclusive arrangement with SSR, LLC, based in Stamford, Connecticut. They provide specialized research into sectors of the economy such as Healthcare and Innovation Technology. SSR is an independent investment firm whose analysts have been highly ranked and are recognized as leaders in their respective fields. Their fundamental company level research is often non-consensus and provides guidance on overall portfolio construction and security selection.

Looking ahead, Middlefield remains committed to managing and developing new and unique investment products to assist Financial Advisors in helping clients achieve their investment objectives.

A NOTE ON FORWARD LOOKING STATEMENTS

This document may contain forward looking statements, including statements regarding: the Fund, its strategies, goals and objectives; prospects; future performance or condition; possible future actions to be taken by the Fund; and the performance of investments, securities, issuers or industries in which the Fund may from time to time invest. Forward looking statements include statements that are predictive in nature, that depend upon or refer to future results, events, circumstances, expectations and performance, or that include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates" or negative versions thereof and other similar wording. Forward looking statements are not historical facts, but reflect the Fund's current beliefs as of the date of this document regarding future results, events, circumstances, expectations or performance and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors. Forward looking statements are not guarantees of future performance, and actual results, events, circumstances, expectations or performance could differ materially from those expressed or implied in any forward looking statements contained in this document. Factors which could cause actual results, events, circumstances, expectations or performance to differ materially from those expressed or implied in forward looking statements include, but are not limited to: general economic, political, market and business factors and conditions; commodity price fluctuations; interest and foreign exchange rate fluctuations; global equity and capital markets; the financial condition of each issuer in which the Fund invests; the effects of competition in the industries or geographic areas in which the Fund may invest; statutory and regulatory developments; unexpected judicial or regulatory proceedings; and catastrophic events. Readers are cautioned that the foregoing list of factors is not exhaustive and to avoid placing undue reliance on forward looking statements due to the inherent uncertainty of such statements. The Fund does not undertake, and specifically disclaims, any obligation to update or revise any forward looking statements, whether as a result of new information, future developments, or otherwise.

2021 MID-YEAR REVIEW AND OUTLOOK

Global equities performed exceptionally well during the first half of 2021, with most major indices closing at all-time highs. The S&P 500, TSX Composite and Euro Stoxx 50 generated total returns of 15.2%, 17.3% and 16.6%, respectively. Inflows into global equity funds during the first half of the year totaled \$580 billion, the largest on record by a significant margin. It's expected that if the current pace of inflows continues throughout the second half of the year, equity funds will take in more money in 2021 than the previous twenty years combined.

Markets have been supported by the economic reopening, led by cyclical and value sectors. This began in November 2020 when initial positive vaccine data from Pfizer, Moderna and AstraZeneca provided a pathway to ending the pandemic. Vaccine rollouts progressed swiftly once they were approved, allowing restrictions to be lifted at a gradual pace throughout the world. As of July 2021, over 78.5% of Canadians aged 12 years or older had received at least one dose of a COVID-19 vaccine -- the highest adoption rate in the world. We believe economic momentum will continue in North America as second doses are administered and remaining restrictions are lifted, including the reopening of the U.S.-Canada border.

Economic reopening has contributed to rising inflation, with Core CPI, PPI and PCE inflation statistics spiking during the second quarter of 2021. As a result, global central banks, including the Bank of Canada and the Federal Reserve, are now adopting a more hawkish tone when guiding future monetary policy. A certain amount of tightening is now being priced in but this should not have a major impact on equities as long as it happens gradually and is appropriately signaled. This is reflected in equities reaching new highs in conjunction with U.S. 10-Year Treasury yields and Canadian Government 10-Year Bond yields increasing by 55 bps and 71 bps during the first half, respectively.

In the six months ended June 30, 2021, the Mint Income Fund generated a total return of 22.7%. The Fund provides unitholders with stable income in the form of monthly distributions in addition to capital appreciation potential, underpinned by an actively managed portfolio primarily comprised of equity income securities. The positive year-to-date performance builds upon the Fund's longstanding track record of generating attractive risk-adjusted returns to unitholders. Since the Fund's inception in 1997, the Fund has generated an annualized total return of 8.8%, outperforming the S&P/TSX Composite's annualized total return of 7.6% over the same period.

The real estate sector has outperformed this year in both Canada and the US, generating total returns of 21.7% and 23.3%, respectively. Cyclical asset classes that are positively correlated with the economic reopening, such as retail and office, were the biggest contributors to performance. Looking ahead to the second half of 2021, we remain bullish on industrial REITs, which have lagged the sector by more than 4% in Canada. E-Commerce activity increased as a result of the pandemic and continues to drive increasing demand for industrial properties. Availability rates in Vancouver, Toronto and Montreal are at 1.1%, 1.2% and 1.4%, respectively as new supply is unable to keep pace with the rate of absorption, thereby leading to rapid growth in rents. In 2021, more than 26 million square feet of industrial space has been absorbed in Canada relative to a more modest 8.8 million square feet of completions. Demand is also at record highs in the U.S. with net absorption of 85.6 million square feet during the first quarter – the second highest on record.

Middlefield REIT IndexPlus generated a total return of 17.2% during the first half of 2021, adding to its 10+ year track record of generating attractive returns for unitholders. Since inception in April 2011, the Fund has generated an annualized total return of 9.3%, outperforming the S&P/TSX Capped REIT's annualized total return of 8.2% over the same period. Leveraging Middlefield's expertise in managing real estate portfolios, Real Estate & E-Commerce Split Corp. was launched November 19, 2020. Since inception to June 30th, 2021, the corporation's Class A shares generated a total return of 30.7%.

The S&P 500 healthcare sector generated a total return of 11.9% during the first half of the year, trailing the broader market by over 3%. Pharmaceuticals and biotechnology, both large industry weights within the sector, underperformed and were negative contributors to performance. The S&P 500 pharmaceuticals industry ended Q2 trading at a forward price to earnings ratio of just 14.7x compared to the sector multiple of 17.2x and the broader market multiple of 21.6x. We have a positive long-term outlook on the healthcare sector and see potential for increasing returns in the second half of the year given its combination of quality and defense at attractive valuations. Healthcare consumption is normalizing with physician visits returning and restrictions on elective surgeries being lifted. Recent employment data in the U.S. has also been encouraging, which supports a healthy reimbursement environment for healthcare providers.

The Middlefield Healthcare & Life Sciences ETF and the Middlefield Health & Wellness ETF have generated annualized total returns of 9.3% and 10.6% since inception on July 21st, 2017 and October 20th, 2016, respectively. Both Funds invest in diversified portfolios primarily comprised of dividend-paying companies that operate in the global healthcare sector, an area underrepresented in the Canadian market. The two ETFs share select core holdings but offer distinct strategies that have created value over the long term. Middlefield Healthcare & Life Sciences ETF has a sleeve dedicated to the life sciences sector, mostly comprised of biotechnology companies identified in collaboration with our exclusive industry advisor, SSR Health. Middlefield Health & Wellness ETF has an actively managed allocation to health & wellness comprised of high-conviction issuers at the forefront of the global movement focused on healther lifestyles.

MIDDLEFIELD ETFs |

The Middlefield family of Exchange Traded Funds consists of 4 strategies, all of which are listed on the Toronto Stock Exchange. The solutions are actively managed and their mandates provide exposure to precise assets and themes, which include Healthcare, REITs and the American core sectors.

Information Technology demonstrated market leadership in 2020 but lagged during most of 2021 as the economic reopening primarily benefited cyclically-oriented companies. This trend reversed in June with the NASDAQ rising 5.6%, supported by general strength across tech-focused industries. The pandemic has accelerated certain secular trends including E-commerce and working from home, thereby driving demand for datareliant services such as streaming, cloud storage and virtual communication. As a result, we maintain a very optimistic long-term outlook on the technology sector.

Middlefield Sustainable Innovation & Health Dividend Fund has generated a total return of 10.2% year-to-date. The Fund's actively managed portfolio of leading global innovative technology and healthcare companies is complemented by an allocation to private healthcare royalty investments and utilizes a strategy that incorporates ESG principles to identify sustainable investments. Middlefield Digital Consumer Dividend Fund and Middlefield Global Innovation Dividend Fund provide exposure to the structural growth in technology-enabled trends while delivering stable income in the form of monthly distributions. Launched June 27th, 2019, Middlefield Digital Consumer Dividend Fund has generated an annualized return of 23.5% and Middlefield Global Innovation Dividend Fund has generated an annualized total return of 19.9% since inception on March 23rd, 2018.

The backdrop for sustainable infrastructure, specifically renewables, strengthened during the first half of the year. We are witnessing a seismic shift in the way society consumes and produces energy. In April 2021, the U.S. pledged to slash its greenhouse gas emissions by at least 50% by 2030 and to achieve net-zero emissions by 2050, joining the world's largest economies in setting aggressive long-term climate targets. The private sector generally, and the world's largest companies in particular, are also providing major support for net zero investments. For example, Apple has committed to being 100% carbon neutral from its supply chain and products by 2030 and Microsoft has pledged by 2050 to remove all the carbon it has emitted since it was founded in 1975. An interest rate-driven selloff in renewable focused companies during the first half has led to attractive valuations and compelling entry points with major clean energy supermajors pricing in near-zero value for future growth.

In March 2021, Middlefield completed its initial public offering of Middlefield International Clean Power Fund for gross proceeds of \$200 million. We are excited about the long-term outlook for the Fund due to the increasing demand for renewable power stemming from growing political, corporate and societal support for clean green energy as well as continued reductions in costs. We believe these factors will drive ongoing and increasing levels of investor interest in renewable power and related sectors for decades to come. The launch of Middlefield International Clean Power Dividend Fund follows on the successful launch of Middlefield Sustainable Infrastructure Dividend Fund on March 25th, 2020, which has generated an annualized total return of 21.4% since its inception.

Commodity prices increased significantly during the first half. WTI crude oil prices have risen more than 50% this year while North American natural gas prices are at their highest levels in seven years. Against this backdrop, we anticipate significant free cash flow generation from the Canadian energy sector which can be used for strategic investments in renewables, carbon capture and storage, hydrogen infrastructure and other initiatives aligned with ESG principles. Enbridge continues to stand out as an ESG leader among its peers, with the company recently publishing another comprehensive Sustainability Report as well as a framework for issuing sustainability-linked bonds that link corporate costs to ESG performance, further aligning the interests of shareholders and company management.

Class A shares of E-Split generated a total return of 47.3% during the first half of the year. This compares to the 26.4% total return generated by Enbridge Inc., the Fund's sole underlying asset. E-Splits positive year-to-date performance demonstrates the significant capital gain potential embedded in the Corporation's split share structure. In addition, E-Split shares provide robust levels of income to investors. The Class A shares pay monthly distributions of \$0.13125 and the Corporation's Preferred Shares pay quarterly distributions of \$0.13. E-Split completed two successful overnight offerings during the first half of the year on March 2nd and April 27th, raising gross proceeds of \$82 million in aggregate.

The outlook for equity income remains attractive. Despite the recent increases in longer duration bond yields, interest rates are near historical lows and support current market multiples. While corporate earnings have been very strong in the first half of 2021, we expect this momentum to continue well into 2022. Over the long-term, we believe an actively managed diversified portfolio of dividend paying and dividend growing equities should generate attractive risk-adjusted returns. We remain focused on companies with predictable cash flows and sustainable business models to mitigate volatility.

Dean Orrico President, CEO and Chief Investment Officer Middlefield Capital Corporation

Robert F. Lauzon Managing Director and Deputy Chief Investment Officer Middlefield Capital Corporation

FOR THE SIX MONTHS ENDED JUNE 30, 2021

This interim management report of fund performance contains financial highlights but does not contain the annual financial statements of the investment fund. This report should be read in conjunction with the complete interim financial report of the investment fund that follows this report. The interim financial report has not been reviewed by the investment fund's external auditors.

Unitholders may contact us by calling 1-888-890-1868, by writing to us at Middlefield Group at one of the addresses on the back cover or by visiting our website at <u>www.middlefield.com</u> to request a copy of the investment fund's annual financial statements, proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosure.

Management's Discussion of Fund Performance

Investment Objectives and Strategies

The investment objectives of Middlefield REIT INDEXPLUS ETF (the "Fund") are to: (i) provide holders with stable monthly cash distributions, and (ii) outperform the S&P/TSX Capped REIT Index (the "Index") on a total return basis. At least 30% and up to 80% of the Fund's assets are invested in a diversified portfolio of securities, which consists of those securities that comprise the Index in the same proportion, to the extent practicable, as they comprise the Index. The remainder of the Fund's assets are invested in an actively managed portfolio, comprised primarily of securities of issuers in the global real estate sector.

Results of Operations

Investment Performance

During the first half of 2021, the net assets of the Fund increased to \$101.0 million at June 30, 2021 from \$83.8 million at December 31, 2020. On a per unit basis, the net assets of the Fund increased from \$12.97 at December 31, 2020 to \$14.72 at June 30, 2021. The Fund recorded a net gain on its investment portfolio of approximately \$14.2 million or \$2.16 per unit during the period.

Revenue and Expenses

Revenue before expenses for the period ended June 30, 2021 amounted to \$15.0 million, up from a loss of \$8.8 million in the prior year period, primarily as a result of unrealized gains recorded on the Fund's portfolio investments. Operating expenses amounted to \$0.5 million in the first half of 2021, virtually unchanged from the first half of 2020. The operating expenses contributed to the management expense ratio ("MER") of 0.99% in the first six months of 2021, up from 0.98% in 2020. As a result, profit after tax amounted to \$14.5 million or \$2.20 per unit, increased from a loss of \$9.3 million or \$1.34 per unit in the prior year period. Distributions for the six months ended June 30, 2021 amounted to \$0.45 per unit.

Trends

The real estate sector has outperformed this year in both Canada and the US, generating total returns of 21.7% and 23.3%, respectively. Cyclical asset classes that are positively correlated with the economic reopening, such as retail and office, were the biggest contributors to performance. E-Commerce activity increased as a result of the pandemic and continues to drive increasing demand for industrial properties.

Related Party Transactions

Pursuant to a management agreement, Middlefield Limited (the "Manager") receives a management fee. For further details, please see the "Management Fees" section of this report. Middlefield Capital Corporation ("MCC" or the "Advisor"), the advisor to the Fund and a company under common control with the Manager, receives advisory fees from the Manager out of the management fee. MCC also receives brokerage commissions from the Fund in connection with securities transactions. All brokerage commissions paid by the Fund to MCC were at or below market rates. For further details, please see the notes to the financial statements.

Management Fees

Management fees are calculated at 0.6% per annum of the net asset value of the Fund and are split between the Manager and the Advisor. The Manager receives fees for the general administration of the Fund, including maintaining the accounting records, executing securities trades, monitoring compliance with regulatory requirements, and negotiating contractual agreements, among other things. The Advisor receives fees from the Manager for providing investment advice in respect of the portfolio in accordance with the investment objectives and strategies of the Fund.

Financial Highlights

Net Assets are calculated in accordance with International Financial Reporting Standards ("IFRS").

"Net Asset Value" is calculated in accordance with section 14.2 of National Instrument 81-106 "Investment Fund Continuous Disclosure" ("NI 81-106") and is used for transactional pricing purposes.

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the indicated periods. Ratios and Supplemental Data are derived from the Fund's Net Asset Value.

FOR THE SIX MONTHS ENDED JUNE 30, 2021

⁽¹⁾ This information is derived from the Fund's audited annual financial statements and unaudited interim financial report.

(2) Net Assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the financial period. This schedule is not a reconciliation of Net Assets since it does not reflect unitholder transactions as shown on the Statements of Changes in Net Assets Attributable to Holders of Redeemable Units and accordingly columns may not add.

⁽³⁾ Distributions were paid in cash/reinvested in additional units of the Fund, or both.

⁽⁴⁾ For the six-month period ended June 30, 2021.

⁽⁵⁾ On February 6, 2019, a special unit distribution amounting to \$0.35 per unit was paid and immediately thereafter the outstanding units of the fund were consolidated.

Ratios and Supplemental Data

	June 30 2021 ⁽⁴⁾	December 31, 2020	December 31, 2019	December 31, 2018	December 31, 2017	December 31, 2016
		,	,	,	,	
Total Assets (000s)	\$ 101,598	\$ 84,387	\$ 101,500	\$ 58,354	\$ 74,341	\$ 76,126
Total Net Asset Value (000s)	\$ 100,958	\$ 83,795	\$ 100,853	\$ 49,976	\$ 58,938	\$ 65,595
Number of Units Outstanding	6,860,240	6,460,240	7,010,240	3,933,544	4,496,379	5,199,625
Management Expense Ratio ("MER") ⁽¹⁾	0.99%	0.98%	0.95%	1.42%	1.50%	1.56%
MER (excluding interest expense and						
issuance costs) ⁽¹⁾	0.99%	0.98%	0.94%	1.02%	1.19%	1.30%
Trading Expense Ratio ⁽²⁾	0.04%	0.11%	0.11%	0.08%	0.12%	0.08%
Portfolio Turnover Rate ⁽³⁾	8.15%	36.94%	47.98%	12.14%	35.59%	36.00%
Net Asset Value per Unit	\$ 14.72	\$ 12.97	\$ 14.39	\$ 12.70	\$ 13.11	\$ 12.62

⁽¹⁾ The MER is based on total expenses (excluding distributions, commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average Net Asset Value during the period. The MER excluding interest expense and issuance costs has been presented separately as it expresses only the ongoing management and administrative expenses of the Fund as a percentage of average Net Asset Value. Issuance costs are one-time costs incurred at inception, and the inclusion of interest expense does not consider the additional revenues that have been generated from the investment of the leverage in income-generating assets.

⁽²⁾ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average Net Asset Value during the period.

(3) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio investments are managed. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher the Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

⁽⁴⁾ As at June 30, 2021 or for the six-month period ended June 30, 2021, as applicable.

FOR THE SIX MONTHS ENDED JUNE 30, 2021

Past Performance

The performance information shown, which is based on Net Asset Value, assumes that all distributions paid by the Fund in the periods shown were reinvested in additional securities of the Fund. The performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future.

Year-By-Year Returns

The bar chart shows how the Fund's performance has varied from year to year for each of the years shown. The chart indicates, in percentage terms, how much an investment made the first day of the financial period would have grown or decreased by the last day of the financial period.

*For the six-month period ended June 30, 2021.

1. Middlefield REIT INDEXPLUS ETF

Middlefield REIT INDEXPLUS ETF (the "Fund") is an exchange-traded fund ("ETF") established under the laws of the Province of Alberta on March 25, 2011. The Fund converted from a closed-end investment fund into an ETF on February 19, 2019. The Fund's units were re-designated as units of the ETF on a 1:1 basis, and the Toronto Stock Exchange symbol changed from IDR.UN to IDR. The investment strategies of the Fund remain substantially similar before and after the conversion.

Middlefield Limited (the "Manager") is both the manager and trustee of the Fund and Middlefield Capital Corporation ("MCC"), a company under common control with the Manager, is the advisor to the Fund (the "Advisor"). The Fund was listed on the Toronto Stock Exchange and effectively commenced operations on April 20, 2011 when it first issued units through an initial public offering. The address of the Fund's registered office is 812 Memorial Drive N.W., Calgary, Alberta. These financial statements, expressed in Canadian Dollars, were authorized for issuance by the board of directors of the Manager on August 23, 2021.

2. Investment Objectives and Strategy

The Fund's investment objectives are to: (i) provide unitholders with stable monthly cash distributions and (ii) outperform the S&P/TSX Capped REIT Index (the "Index") on a total return basis. At least 30% and up to 80% of the Fund's assets are invested in a diversified portfolio of securities, which consists of those securities that comprise the Index in the same proportion, to the extent practicable, as they comprise the Index. The remainder of the Fund's assets are invested in an actively managed portfolio primarily in securities of issuers in the global real estate sector.

3. Basis of Presentation

These financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") and in accordance with International Accounting Standard 34 Interim Financial Reporting ("IAS 34") as published by the International Accounting Standards Board ("IASB") and as required by Canadian securities legislation and the Canadian Accounting Standards Board.

- 4. Summary of Significant Accounting Policies
- A. Basis of Accounting
- IFRS 9 Financial Instruments ("IFRS 9")

The Fund classifies and measures financial instruments in accordance with IFRS 9 which requires assets to be carried at amortized cost or fair value, with changes in fair value recognized in profit or loss and other comprehensive income, based on the entity's business model for managing financial assets and the contractual cash flow characteristics of the financial assets. The Fund's financial assets and liabilities are classified at fair value profit or loss ("FVTPL") and amortized cost.

Classification, Measurement, Impairment and Hedge Accounting

The Fund classifies its investments in debt and equity securities based on its business model for managing those financial assets and the contractual cash flow characteristics of the financial assets. These financial assets are managed and their performance is evaluated on a fair value basis. The Fund also manages these financial assets with the objective of realizing cash flows through sales. Further, an option to irrevocably designate any equity securities at fair value through other comprehensive income ("FVOCI") was chosen upon adoption. Consequently, these financial assets are mandatorily measured at FVTPL.

Financial assets or financial liabilities held for trading are those acquired principally for the purpose of selling or repurchasing in the near future or on initial recognition they are a part of a portfolio of identified financial instruments that the Fund manages together and has a recent actual pattern of short term profit taking. All derivatives and short positions are included in this category and mandatorily measured at FVTPL. The financial assets and liabilities measured at amortized cost include cash collateral posted on derivative positions, accrued income, due to and from brokers and other short term receivables and payables.

IFRS 9 uses the expected credit loss model ("ECL"), as the new impairment model for financial assets carried at amortized cost. The Fund's financial assets measured at amortized cost consist of trade receivables with no financing component and which have maturities of less than 12 months, as such, it has chosen to apply the simplified ECL approach, whereby any loss allowance is recognized based on the lifetime of ECLs. Due to the high quality and short-term nature of the trade receivables, there are no expected credit losses associated with them and they are not considered impaired at the reporting dates.

The Fund does not apply general hedge accounting to any of its derivatives positions.

JUNE 30, 2021 | UNAUDITED

4. Summary of Significant Accounting Policies (continued)

B. Financial Instruments

The Fund's financial instruments may include: short-term investments, fixed income, equities, structured products including investment funds managed by the Manager, derivatives (collectively referred to as "investments"), cash, accounts receivable – portfolio securities sold, income and interest receivable, accounts receivable, subscriptions receivable, prepaid interest, prepaid expenses, loan payable, accounts payable – portfolio securities purchased, accounts payable and accrued liabilities, redemptions payable and distributions payable. The Fund recognizes financial instruments at fair value upon initial recognition, plus transaction costs in the case of financial instruments measured at amortized cost. Regular way purchases and sales of financial assets are recognized at their trade date. The Fund's investments and derivative assets and liabilities are measured at fair value. All other financial assets and liabilities are measured at amortized cost. Under this method, financial assets and liabilities reflect the amount required to be received or paid, discounted when appropriate, at the contract's effective interest rate. The Fund's accounting policies for measuring the fair value of its investments and derivatives are identical to those used in measuring its net asset value ("NAV") for transactions with unitholders.

The Fund only offsets financial assets and financial liabilities if the Fund has a legally enforceable right to offset recognized amounts and either intends to settle on a net basis or to realize the asset and settle the liability simultaneously.

C. Fair Value Measurement

The Fund's own credit risk and the credit risk of the counterparty are taken into account in determining the fair value of financial assets and financial liabilities, including derivative instruments. Investments and futures contracts are valued at fair value using the policies described below.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value of financial assets and liabilities traded in active markets is based on quoted market prices at the close of trading on the reporting date. The Fund uses the last traded market price for both financial assets and financial liabilities where the last traded price falls within that day's bid-ask spread. In circumstances where the last traded price is not within the bid-ask spread, the Manager determines the point within the bid-ask spread that is most representative of fair value based on the specific facts and circumstances.

The fair value of financial assets and liabilities that are not traded in an active market (for example, over-the-counter derivatives) is determined by using valuation techniques. The Fund uses a variety of methods and makes assumptions that are based on market conditions existing at each reporting date. Valuation techniques used include the use of comparable recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, option pricing models and other valuation techniques commonly used by market participants making the maximum use of market inputs and relying as little as possible on entity specific inputs.

D. Classification of Redeemable Units by the Fund

Under International Accounting Standard ("IAS") 32, *Financial Instruments: Presentation*, the Fund classifies its redeemable units as liabilities. The Fund's redeemable units do not meet the criteria in IAS 32 for classification as equity as the Fund has more than one contractual obligation to its unitholders.

E. Derivative Transactions

The Fund may use derivatives, such as forward currency contracts to hedge against losses caused by changes in exchange rates. The value of forward currency contracts is the gain or loss that would be realized, if on the valuation date, the positions were to be closed out. The change in value of forward currency contracts is included in the Statements of Comprehensive Income – Net Unrealized Gain (Loss) on Investments. Realized gains and losses from derivative instruments that are specific economic hedges are accounted for in the same manner as the underlying investments being hedged and are included in the Statements of Comprehensive Income – Net Realized Gain (Loss) from Investment Transactions.

F. Investment Transactions and Income Recognition

Investment transactions are accounted for as of the trade date and any realized gains or losses from such transactions are calculated on an average cost basis. Average cost does not include amortization of premiums or discounts on fixed income securities with the exception of zero coupon bonds. The change in the difference between fair value and average cost of the investments is recorded as unrealized gain (loss) on investments. Income from investments is recognized on the ex-dividend or ex-distribution date. Interest income for distribution purposes shown on the Statements of Comprehensive Income represents interest from bank deposits received by the Fund, and, if the Fund holds fixed income investments, coupon interest accounted for on an accrual basis. The interest income for distribution purposes is the tax basis of calculating the interest received and which is subject to tax. Income distributions received are treated consistently with dividends and interest and recorded in income in the Statements of Comprehensive Income.

JUNE 30, 2021 | UNAUDITED

4. Summary of Significant Accounting Policies (continued)

G. Increase (Decrease) in Net Assets Attributable to Holders of Redeemable Units per Unit

Increase (Decrease) in Net Assets Attributable to Holders of Redeemable Units per unit in the Statements of Comprehensive Income represents the increase (decrease) in net assets divided by the average units outstanding during the period.

H. Taxation

The Fund qualifies as a mutual fund trust under the provisions of the *Income Tax Act* (Canada). Under the terms of the Declaration of Trust, any taxable income of the Fund is distributable monthly to unitholders of record date. The Fund is not subject to tax on the income distributed to unitholders. Accordingly, no provision for income taxes is required.

The Fund currently incurs withholding taxes imposed by certain countries on investment income and capital gains. Such income and gains are recorded on a gross basis and the related withholding taxes are shown separately in the Statements of Comprehensive Income.

Distributions received from investments in trust units that are treated as a return of capital for tax purposes are used to reduce the average cost of the underlying investments on the Schedule of Investment Portfolio.

I. Foreign Currency Translation

Foreign currency amounts are translated into Canadian dollars as follows: fair value of investments, forward currency contracts and other assets and liabilities, at the closing rate of exchange on each business day; income and expenses, and purchases, sales and settlements of investments, at the rate of exchange prevailing on the respective dates of such transactions.

J. Critical Accounting Estimates and Judgments

The preparation of financial statements requires management to use judgment in applying its accounting policies and to make estimates and assumptions about the future. The following discusses the most significant accounting judgments and estimates that the Fund has made in preparing the financial statements:

Determination of Functional Currency

'Functional currency' is the currency of the primary economic environment in which the Fund operates. If indicators of the primary economic environment are mixed, then management uses its judgment to determine the functional currency that most faithfully represents the economic effect of the underlying transactions, events and conditions. The majority of the Fund's investments and transactions are denominated in Canadian dollars. Investor subscriptions and redemptions are also received and paid in Canadian dollars. Accordingly, management has determined that the functional currency of the Fund is Canadian dollars.

Fair Value Measurement of Derivatives and Securities Not Quoted in an Active Market

The Fund may hold financial instruments that are not quoted in active markets, including derivatives. Fair values of such instruments are determined using valuation techniques and may be determined using reputable pricing sources (such as pricing agencies) or indicative prices from market makers. Broker quotes as obtained from the pricing sources may be indicative and not executable or binding. Where no market data is available, the Fund may value positions using its own models, which are usually based on valuation methods and techniques generally recognized as standard within the industry. The models used to determine fair values are validated and periodically reviewed by experienced personnel of the Manager, independent of the party that created them. The models used for private equity securities are based mainly on earnings multiples adjusted for a lack of marketability as appropriate.

Models use observable data, to the extent practicable. However, areas such as credit risk (both own and counterparty), volatilities and correlations require the Manager to make estimates. Changes in assumptions about these factors could affect the reported fair values of financial instruments. The Fund considers observable data to be market data that is readily available, regularly distributed and updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. Refer to Note 5 for further information about the fair value measurement of the Fund's financial instruments.

K. Securities Lending

The Fund may enter into securities lending transactions. These transactions involve the temporary exchange of securities as collateral with a commitment to deliver the same securities on a future date. Income is earned from these transactions in the form of fees paid by the counterparty and, in certain circumstances, interest paid on securities held as collateral. Income earned from these transactions is recognized on an accrual basis and is included in the Statements of Comprehensive Income.

JUNE 30, 2021 | UNAUDITED

5. Fair Value Disclosure

The Fund classifies fair value measurements within a hierarchy which gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The fair values of the Fund's financial instruments are classified into levels using the following fair value hierarchy:

Level 1	Inputs that reflect unadjusted quoted prices in active markets for identical assets or liabilities that are accessible at the measurement date.
Level 2	Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly, including inputs in markets that are not considered to be active.
Level 3	Inputs that are unobservable and where there is little, if any, market activity. Inputs into the

Inputs that are unobservable and where there is little, if any, market activity. Inputs into the determination of fair value require significant management judgment or estimation.

As at June 30, 2021

Description	Level 1	Level 2	Level 3	Total
Equities	\$ 94,702,258	\$ -	\$ 575,000	\$ 95,277,258
Corporate Debt	-	1,271,040	-	1,271,040
Total	\$ 94,702,258	\$ 1,271,040	\$ 575,000	\$ 96,548,298
As at December 31, 2020 Description	Level 1	Level 2	Level 3	Total
Equities Corporate Debt	\$ 79,572,845	\$ - 1,160,400	\$ -	\$ 79,572,845 1,160,400
Total	\$ 79,572,845	\$ 1,160,400	\$ -	\$ 80,733,245

All fair value measurements are recurring. The carrying values of cash, income and interest receivable, subscriptions receivable, accounts receivable, prepaid interest, loan payable, accounts payable and accrued liabilities and distributions payable approximate their fair values due to their short-term nature. Fair values of the Fund's investments are classified as Level 1 when the related security is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3.

No transfers between levels have occurred during the periods ended June 30, 2021 and December 31, 2020.

6. Financial Risk Management

In the normal course of business, the Fund is exposed to a variety of financial risks: price risk, interest rate risk, foreign exchange rate risk, liquidity risk, credit risk and concentration risk. The Fund's primary risk management objective is to protect earnings and cash flow and, ultimately, unitholder value. Risk management strategies, as discussed below, are designed and implemented to ensure the Fund's risks and related exposures are consistent with its objectives and risk tolerance.

Most of the Fund's risks are derived from its investments. The value of the investments within the Fund's portfolio can fluctuate on a daily basis as a result of changes in interest rates, economic conditions, commodity prices, the market and company news related to specific securities held by the Fund. The investments are made in accordance with the Fund's risk management policies. The policies establish investment objectives, strategies, criteria and restrictions. The objectives of these policies are to identify and mitigate investment risk through a disciplined investment process and the appropriate structuring of each transaction.

6. Financial Risk Management (continued)

A. Price Risk

Price risk is the risk that changes in the prices of the Fund's investments will affect the Fund's income or the value of its financial instruments. The Fund's price risk is driven primarily by volatility in commodity and equity prices. Rising commodity and equity prices may increase the price of an investment while declining commodity and equity prices may have the opposite effect. The Fund mitigates price risk by making investing decisions based upon various factors, including comprehensive fundamental analysis prepared by industry experts to forecast future commodity and equity price movements. The Fund's market positions are monitored on a daily basis by the portfolio manager and regular financial reviews of publicly available information related to the Fund's investments are performed to ensure that any risks are within established levels of risk tolerance. The Fund is exposed to price risk through the following financial instrument:

	June 30, 2021	December 31, 2020		
Investments at FVTPL	\$ 95,277,258	\$	79,572,845	

Based on the above exposure at June 30, 2021, a 10% increase or decrease in the prices of the Fund's investments would result in a \$9,527,726 (December 31, 2020 – \$7,957,285) increase or decrease in net assets of the Fund, with all other factors held constant.

B. Interest Rate Risk

Interest rate risk describes the Fund's exposure to changes in the general level of interest rates. Interest rate risk arises when the Fund invests in interest-bearing financial assets such as cash and utilizes financial liabilities such as loan payable. In respect to cash balances and loan payable, the Fund's interest income and expense are positively correlated to interest rates in that rising interest rates increase both interest income and expense while the reverse is true in a declining interest rate environment. The Fund has not hedged its exposure to interest rate movements. The Fund seeks to mitigate this risk through active management, which involves monitoring debt levels and analysis of economic indicators to forecast Canadian and global interest rates. The Fund is exposed to interest rate risk through the following financial instruments:

	June 30, 2021	December 31, 2020		
Cash	\$ 4,681,119	\$	3,288,651	
Debt Securities	(1,271,040)		(1,160,400)	
Net Exposure	\$ 3,410,079	\$	2,128,251	

Based on the above exposure at June 30, 2021, a 1% per annum increase or decrease in interest rates would result in a \$25,605 increase or decrease (December 31, 2020 - \$9,041) in net assets of the Fund, with all other factors held constant.

C. Foreign Exchange Rate Risk

Foreign exchange rate risk describes the impact on the underlying value of financial instruments due to foreign exchange rate movements. The Canadian dollar is the Fund's functional and reporting currency. Foreign investments, commodities, cash, receivables and payables denominated in foreign currencies are affected by changes in the value of the Canadian dollar compared to foreign currencies. As a result, financial assets may depreciate/appreciate in the short-term due to the strengthening/weakening of the Canadian dollar against other currencies, and the reverse would be true for financial liabilities. The Fund's exposure to foreign exchange rate risk relates primarily to its investment in securities, which are denominated in various foreign currencies. The Fund has not hedged its exposure to currency fluctuations; however, it closely monitors relevant foreign exchange currency movements. The Fund is exposed to foreign exchange rate risk through the following financial instruments:

JUNE 30, 2021 | UNAUDITED

6. Financial Risk Management (continued)

C. Foreign Exchange Rate Risk (continued)

As at June 30, 2021

	Investments at		Income and Interest	
Currency	FVTPL	Cash	Receivable	Total Exposure
U.S. Dollar	\$ 30,615,137	\$ 61,530	\$ 58,152	\$ 30,734,819
U.K. Pound Sterling	1,872,316	-	-	1,872,316
Total	\$ 32,487,453	\$ 61,530	\$ 58,152	\$ 32,607,135

As at December 31, 2020

	Investments at		Income and Interest	
Currency	FVTPL	Cash	Receivable	Total Exposure
U.S. Dollar	\$ 28,836,406	\$ 2,008,219	\$ 68,056	\$ 30,912,681
U.K. Pound Sterling	1,650,239	-	-	1,650,239
Total	\$ 30,486,645	\$ 2,008,219	\$ 68,056	\$ 32,562,920

Based on the above exposure at June 30, 2021, a 10% increase or decrease in the Canadian dollar against the respective foreign currencies would result in a \$3,260,714 (December 31, 2020 – \$3,256,292) decrease or increase in net assets of the Fund, with all other factors held constant.

D. Liquidity Risk

Liquidity risk is defined as the risk that the Fund may not be able to settle or meet its obligations when due. The Fund is subject to the potential daily net redemptions of units. Liquidity risk is managed by investing the majority of the Fund's assets in investments that are traded in an active market and can be readily sold. The Fund's other obligations are due within one year. The Fund retains sufficient cash to maintain liquidity and comply with liquidity requirements as outlined by securities legislation and its investment policies.

The Fund may invest in securities that are not traded on a public stock exchange or that may be illiquid. As a result, the Fund may not be able to dispose of these investments in a timely manner. The Fund mitigates this risk through active management, which includes detailed analysis of such entities to ensure they are financially sound and would be attractive to potential investors if a sale is necessary. The Fund's investment policies and securities legislation limit the amount invested in illiquid securities and these limits are monitored. At June 30, 2019 and December 31, 2020, the Fund did not hold any illiquid securities.

The tables below present the Fund's financial liabilities based on the remaining period to the contractual maturity date. The amounts in the tables reflect the contractual undiscounted cash flows.

As at June 30, 2021

	Less than	1 to 3	3 Months to	
Financial Liabilities	1 Month	Months	1 Year	Total
Distributions Payable	\$ 514,518	\$ -	\$ -	\$ 514,518
Accounts Payable and Accrued Liabilities	125,214	-	-	125,214
Total	\$ 639,732	\$ -	\$ -	\$ 639,732

JUNE 30, 2021 | UNAUDITED

6. Financial Risk Management (continued)

D. Liquidity Risk (continued)

As at December 31, 2020	Less than	1 to 3	3	B Months to	
Financial Liabilities	1 Month	Months		1 Year	Total
Distributions Payable	\$ 484,519	\$ -	\$	-	\$ 484,519
Accounts Payable and Accrued Liabilities	106,765	-		-	106,765
Total	\$ 591,284	\$ -	\$	-	\$ 591,284

The Manager does not expect that the contractual maturity disclosed above will be representative of the actual cash outflows, as holders of these instruments typically retain them for a longer period.

E. Credit Risk

Credit risk represents the financial loss that the Fund would experience if a counterparty to a financial instrument failed to meet its obligations to the Fund. The Fund is exposed to credit risk on its debt instruments, derivative assets, cash and cash equivalents and other short term trade receivables. The Fund measures credit risk and lifetime ECLs related to the trade receivables using historical analysis and forward looking information in determining the ECL. The carrying amounts of financial assets represent the maximum credit exposure. All transactions executed by the Fund in listed securities are settled upon delivery using approved brokers. The risk of default is considered minimal as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase only once the broker has received the securities. The trade will fail if either party fails to meet its obligations. There is no significant credit risk related to the Fund's receivables.

The Fund has established various internal controls to help mitigate credit risk, including prior approval of all investments by the Advisor whose mandate includes conducting financial and other assessments of these investments on a regular basis. The Fund has also implemented policies which ensure that investments can only be made with counterparties that have a minimum acceptable credit rating.

As at June 30, 2021 and December 31, 2020, the Fund invested in debt instruments and preferred shares with the following credit ratings:

	As a %	o of Net Assets
Debt Instruments by Credit Rating	June 30, 2021	December 31, 2020
No Rating	1.3	1.4

F. Concentration Risk

The Fund is exposed to the possible risk inherent in the concentration of the investment portfolio in a small number of industries or investment sectors. The Manager moderates this risk through careful selection of securities in several investment sectors. At June 30, 2021 and December 31, 2020, the percentages of the Fund's net assets invested in each investment sector were as follows:

	As a %	% of Net Assets
Sector	June 30, 2021	December 31, 2020
Real Estate	88.8	92.4
Financials	2.8	-
Consumer Discretionary	2.7	2.6
Corporate Debt	1.3	1.4
Total	95.6	96.4

JUNE 30, 2021 | UNAUDITED

7. Capital Management

The Fund's capital is its net assets attributable to holders of redeemable units. The Fund's objective when managing capital is to safeguard the Fund's ability to continue as a going concern in order to provide returns for unitholders, maximize unitholder value and maintain financial strength. The Fund manages and adjusts its capital in response to general economic conditions, the risk characteristics of the underlying assets and working capital requirements.

The Fund is not subject to any externally imposed capital requirements. The Fund's overall strategy with respect to capital risk management remains unchanged from the year ended December 31, 2020.

8. Redeemable Units Authorized

The Fund is authorized to issue an unlimited number of transferable, redeemable units, each of which represents an equal, undivided interest in the net assets of the Fund. All units have equal rights and privileges. Unitholders may sell units on the TSX; in addition, unitholders may: (a) redeem units of the Fund for cash at a redemption price per unit equal to the lesser of: (i) 95% of the closing price for the applicable units on the TSX; and (ii) the net asset value per unit, on the effective day of redemption less any costs associated with the redemption; or (b) exchange a prescribed number of units (PNU) or a multiple PNU of the fund for Baskets of Securities and/or cash at an exchange price equal to the net asset value of that number of units less any costs associated with the redemption as determined by the Manager in its sole discretion. Unitholders of the Fund can acquire additional units by participating in the Distribution Reinvestment Plan (the "Plan"). The Plan enables unitholders to reinvest their monthly distributions in additional units of the Fund thereby achieving the benefit of compounding returns. The Plan also allows participants to purchase additional units for cash.

The Fund issued 14.9 million units at \$12 per unit in 2011. On February 12, 2019, the Fund issued 2,434,000 units in exchange for units of merged Global Real Estate Dividend Growers Corp. During the first half of 2021, the Fund redeemed 50,000 units (2020 – 375,000) and issued 450,000 units (2020 – 200,000). For the six months ended June 30, 2021, 5,406 units (2020 – 3,277) were distributed under the Plan, of which nil units (2020 – nil) were issued from treasury.

The average number of units outstanding during the six months ended June 30, 2021 was 6,582,892 (2020 – 6,920,542). This number was used to calculate the Net Assets Attributable to Holders of Redeemable Units per unit.

9. Management Fee and Operating Expenses

The Manager provides investment and administrative services to the Fund. In consideration for such services, the Manager receives a management fee equal to 0.6% per annum of the NAV, calculated and paid monthly in arrears based on the average NAV of the preceding month. The Manager is reimbursed for reasonable costs related to maintaining the Fund and preparation and distribution of financial statements and other documents to unitholders. The Fund is responsible for the payment of all expenses relating to the operation of the Fund and the carrying on of its business.

10. Securities Lending

The Fund has entered into a securities lending program with its custodian, RBC Investor Services Trust, in order to earn additional revenue. The aggregate market value of all securities loaned by the Fund will not exceed 50% of the fair value of the assets of the Fund. The Fund will receive collateral of at least 105% of the fair value of the securities on loan. Collateral held is generally comprised of cash and securities of, or guaranteed by, the Government of Canada or a province thereof, or the United States government or its agencies. Securities lending income reported in the Statements of Comprehensive Income is net of a securities lending charge which the Fund's custodian, RBC Investor Services Trust, is entitled to receive.

JUNE 30, 2021 | UNAUDITED

10. Securities Lending (continued)

For the periods ended June 30, 2021 and 2019, securities lending income was as follows:

	2021	2020
Gross Securities Lending Income	\$ - \$	5,738
Securities Lending Charges	-	(2,008)
Net Securities Lending Income	-	3,730
Withholding Taxes on Securities Lending Income	-	(20)
Net Securities Lending Income Received by the Fund	\$ - \$	3,710

Securities lending charges represented nil% (June 30, 2020 - 35%) of the gross securities lending income, all of which was paid to the Fund's custodian.

As at June 30, 2021 and December 31, 2020, there were no securities loaned.

11. Transaction Costs

Brokerage commissions and other transaction costs paid in connection with securities transactions during the period ended June 30, 2021 amounted to \$16,419 (2020 – \$52,495). Included in this amount is \$6,274 (2020 – \$24,881) in brokerage commissions that were paid to MCC. All brokerage commissions paid by the Fund to MCC were at or below market rates. Brokerage commissions and other transaction costs are expensed and recorded in the Statements of Comprehensive Income.

12. Loss Carryforwards

At December 31, 2020, the Fund did not have any capital losses (2019 – \$nil) or non-capital losses (2019 – \$nil) available for carryforward for tax purposes.

13. Distributions

The Fund pays monthly distributions to unitholders in accordance with its investment objectives. Distributions of the Fund, at the discretion of the unitholder, are reinvested in additional units of the Fund under the Distribution Reinvestment Plan, without sales charge. For the period ended June 30, 2021, distributions amounted to \$0.45 per unit (2020 – \$0.45).

14. The outbreak of the novel coronavirus (COVID-19) has led to governments around the world enacting emergency measures that resulted in business disruptions, volatility in markets and a global economic slowdown. The Manager uses judgment in assessing the impact from such events on assumptions and estimates applied in reporting the assets and liabilities in the Fund's financial statements at June 30, 2021. The duration and full extent of impact of the COVID-19 pandemic are unknown at the reporting date and it is therefore not possible to reliably estimate the entire impact on the financial results and position of the Fund in future periods.
